

Maria Digital Twin Teaching Assistant - Proposal

Maria Digital Twin Teaching Assistant Proposal

Submitted by: Victor Hung | **Date:** January 7, 2026

Background & Problem

The Wisdom Prism Biblical wisdom literature course represents decades of pedagogical expertise combining theological depth with pastoral sensitivity. The instructor's distinctive ability to hold scriptural tension (Proverbs-Ecclesiastes-Job), recognize theological misconceptions, and guide students toward spiritual maturity with cultural discernment makes this course uniquely effective.

Challenge: This teaching voice—shaped by years of cross-cultural ministry and theological formation—exists only in embodied practice. When the instructor is unavailable or deceased, this irreplaceable wisdom will be lost.

Current Gap: The existing Maria AI provides generic responses lacking the instructor's theological convictions, pastoral wisdom, and pedagogical judgment.

Proposed Solution

Develop Maria into a **digital pedagogical twin**—an AI authentically embodying the instructor's teaching voice through systematic knowledge capture and AI customization.

Core Objectives

1. **Voice Preservation:** Capture distinctive tone, response patterns, and pedagogical approaches
2. **Theological Fidelity:** Embed convictions including “敬畏耶和華是智慧的開端” and scriptural tension-holding
3. **Contextual Intelligence:** Track student journeys and respond with personalized guidance
4. **Legacy Continuity:** Establish governance ensuring faithful evolution beyond instructor's lifetime

12-Month Implementation

- **Months 1-3:** Knowledge capture (teaching manifestos, response analysis, module commentary)
- **Months 4-6:** Voice cloning (custom AI prompts, optional fine-tuning)
- **Months 7-9:** Context awareness (student history tracking, conversational memory)
- **Months 10-12:** Wisdom integration (case-based reasoning, theological guardrails)
- **Ongoing:** Governance board oversight and succession planning

Expected Outcomes

- Students receive personalized, theologically-sound guidance 24/7
- Instructor multiplies teaching impact while maintaining quality
- Institution preserves pedagogical assets beyond faculty tenure
- Future generations access faithful wisdom literature education

Success Metrics: 70%+ instructor-Maria response similarity; 80%+ student satisfaction; sustainable governance by Year 2

Resources Required

Time: 180-250 hours Year 1 (primarily instructor documentation) **Budget:** \$1,500-3,500 Year 1; \$200-500/year ongoing **Governance:** 3-5 person advisory board for quarterly oversight

Ethical Safeguards

Students know they're interacting with AI, not human presence. Maria directs to human mentorship for pastoral crises. Governance board maintains authority to modify or sunset Maria if theological drift occurs. Maria positions as assistant pointing toward deeper connection, never replacement.

Vision

In 50 years, students who never met the original instructor learn through Maria's guidance to hold scriptural tension, fear the Lord, and pursue wisdom—not because AI suffices, but because faithful teachers invested in preserving what the Holy Spirit taught them.

This is technology extending faithful teaching across generations.
